NOTAS

| Variable | Notas |
|--|--|
| Volumen concesionado de agua superficial y subterránea para usos específicos | El volumen concesionado, en los datos hasta el año 2007, corresponde al lugar del título inscrito en el Registro Público de Derechos de Agua (REPGA) y no del aprovechamiento; de 2008 en adelante, la regionalización de los volúmenes se hizo con base en la ubicación de los aprovechamientos inscritos en el REPGA y no el lugar de adscripción de los títulos respectivos. Las sumas pueden no coincidir por el redondeo de las cifras. El uso agrícola incluye los rubros agropecuario, pecuario, acuacultura, múltiples y otros de la clasificación del REPGA, además de los volúmenes de agua que se encuentran pendientes de inscripción (2.05 km³). El uso de abastecimiento público incluye los usos público urbano y doméstico de la clasificación del REPGA. El uso de industria autoabastecida incluye los usos industrial, agroindustrial, servicios y comercio de la clasificación del REPGA. Información 2012, cambió la configuración geográfica en las regiones hidrológicas administrativas, excepto Pacífico Norte, por la aplicación del Acuerdo de Circunscripción territorial de los organismos de Cuenca de la Comisión Nacional del Agua, publicado en el DOF el 1 de abril de 2010. Por lo tanto, la información de años anteriores, para esas regiones, no es comparable. Los cambios presentados en la serie a partir de este año no son necesariamente por la naturaleza de la información, si no por cambios administrativos. |
