NOTAS

Variable	Notas
Superficie forestal afectada por incendios	En el año 2011, particularmente en Coahuila, se combinaron condiciones climatológicas y geográficas (altas temperaturas, fuertes vientos y difícil acceso a las áreas afectadas) que dificultaron el control de los incendios ocurridos. Algunos totales no coinciden con la suma de sus parciales debido a redondeo de las cifras. 2017: Avance al 28 de septiembre. Con motivo de la reforma de la Constitución Política de los Estados Unidos Mexicanos publicada el 29 de enero de 2016 en el Diario Oficial de la Federación, el Distrito Federal cambió su denominación a Ciudad de México. La información correspondiente a dicha entidad se presenta con este nuevo nombre.
