NOTAS

| Variable | Notas |
|-------------------------|---|
| Número de embarcaciones | Las embarcaciones de pesca ribereña, cuyo propósito principal es comercial, tienen eslora menor o igual a 10 metros. En 1997 la Comisión Intersecretarial de Seguridad y Vigilancia Marítima y Portuaria realizó un inventario nacional de embarcaciones, por lo que se pudo contar con información fidedigna y actualizada. Por ello, el dato del número de embarcaciones de pesca ribereña para el año 1997 no debe interpretarse como un incremento de la flota respecto de 1996, sino como una actualización de la información respectiva. Los datos de embarcaciones de pesca de altura corresponden a las pesquerías camarón, atún, sardina-anchoveta y escama. Dentro de la categoría escama se incluyen todas aquellas embarcaciones que se dedican a la captura de especies cuya producción de manera individual no tiene una participación destacada en el volumen de la producción pesquera nacional. La información proviene del Registro Nacional de Pesca y Acuicultura, y fue tomada de los Anuarios indicados en la fuente hasta el año 2013; no |

NOTAS

| Variable | Notas |
|----------|--|
| | se ha publicado una edición posterior. Los datos posteriores a 2013 fueron proporcionados por la Comisión Nacional de Acuicultura y Pesca (CONAPESCA). Las embarcaciones de pesca de altura en los años 2013-2016 incluyen sólo embarcaciones mayores activas, es decir, embarcaciones que reportan producción en el año, que tengan permiso vigente y estén activas según el monitoreo satelital. Cabe mencionar que esta acotación sobre embarcaciones mayores activas es presentada para toda la serie histórica 1974-2013 en el Anuario Estadístico de Acuicultura y Pesca 2013, pero en realidad aplica sólo para el año 2013 (Dirección General de Planeación, Programación y Evaluación, CONAPESCA, 2015). 2015-2016: Información preliminar. 2017: Aún no está disponible la información de cierre anual (revisión: Agosto, 2018). |
