| 2018               | 965  | 110,252.18                     |                          |
| 2019               | 979  | 115,636.45                     |                          |

NOTAS

| Variable                          | Notas   |
|-----------------------------------|---|
| Número de plantas potabilizadoras | La variable se refiere tanto al número total de plantas registradas como al número de plantas en operación. La información presentada procede originalmente de la publicación Situación del subsector de agua potable, alcantarillado y saneamiento, sin embargo, como esta publicación dejó de incluir la estadística de plantas totales a partir del año 2006, esta última información se continuó tomando de la publicación Inventario Nacional de Plantas Municipales de Potabilización y de Tratamiento de Aguas Residuales en Operación, donde es presentada sólo a nivel nacional (hasta el año 2016, pues las ediciones más recientes han dejado de incluir el dato de plantas totales); la información de mayor detalle se publica sólo para las plantas en operación. Debido a lo anterior, la información de plantas totales por entidad federativa dejó de actualizarse del año 2006 en adelante. Asimismo, el desglose de las plantas totales por proceso de potabilización dejó de actualizarse después de la edición 2002 de la publicación "Situación del subsector de agua potable, alcantarillado y saneamiento". <BR> Entre los distintos procesos de potabilización que se realizan, el llamado Clarificación Completa también es conocido como Clarificación Convencional, y tiene el propósito de eliminar sólidos suspendidos, lo mismo que los procesos Clarificación de Patente y Filtración. Otros procesos son: Ablandamiento, para la eliminación de la Dureza del agua, Adsorción para eliminar trazas de compuestos orgánicos y Ósmosis Inversa para eliminar sólidos disueltos.<BR>Con motivo de la reforma de la Constitución Política de los Estados Unidos Mexicanos publicada el 29 de enero de 2016 en el Diario Oficial de la Federación, el Distrito Federal cambió su denominación a Ciudad de México. La información correspondiente a dicha entidad se presenta con este nuevo nombre. |
| Gasto Potabilizado                | Volumen de agua potable producido por unidad de tiempo: litros por segundo (l/s).<br>El gasto de las plantas potabilizadoras que reportan a la Comisión Nacional del Agua los organismos operadores (dependientes de las autoridades municipales), son estimados en la mayoría de los casos, por carecer las instalaciones de elementos de medición. Debe señalarse que, en ocasiones, los volúmenes estimados son aproximados.   |
