NOTAS

| Variable | Notas |
|---|--|
| Contingencias ambientales ocurridas en los recursos naturales de jurisdicción federal | Una contingencia ambiental es una situación de riesgo, derivada de actividades humanas o fenómenos naturales, que puede poner en peligro la integridad de uno o varios ecosistemas (Ley General del Equilibrio Ecológico y la Protección al Ambiente, Artículo 3, fracción VIII). La información del periodo 2003 en adelante corresponde sólo a recursos marinos. La afectación a la vida silvestre debido a contingencias también es atendida por la PROFEPA, sin embargo, la información correspondiente no está disponible (revisión: Octubre, 2020). La fuente indica que en la generación de esta información utiliza, de forma complementaria, la consulta del Sistema Institucional de Información de la PROFEPA (SIIP) y los Informes de las Delegaciones de la PROFEPA en los Estados que se remiten a la Dirección General de Inspección y Vigilancia de Vida Silvestre, Recursos Marinos y Ecosistemas Costeros de la Subprocuraduría de Recursos Naturales. |
